EDUCATION

Scaler School of Technology (SST), Bengaluru

2025-2029

Computer Science & Artificial Intelligence

Birla Institute of Technology and Science (BITS), Pilani

2025-2029

Bachelor of Science in Computer Science

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, HTML, CSS

Frontend: React, Node.js

Backend & Databases: FastAPI, SQLAlchemy, MySQL, REST APIs

Tools & Libraries: Git, GitHub, NumPy

EXPERIENCE

Core Team Lead – Sponsorships | Ascent 2026, Scaler School of Technology

March 2026 – May 2026

Led sponsorship outreach initiatives for SST's flagship tech fest.

- Reached out to 150+ companies for sponsorship opportunities, successfully securing partnerships with 10+ organisations.
- Coordinated communication and negotiations with industry stakeholders.

Core Team Member | Scaler Innovation Labs

March 2026 – Present

Contributed to the planning and execution of innovation-focused events and programs.

- Organised and hosted mentor sessions featuring industry professionals.
- Assisted in managing hackathons, workshops, and technical events including logistics, participant engagement, and hospitality.

OPEN SOURCE

Open Source Contributor | GirlScript Summer of Code (GSSoC)

May 2026 – August 2026

Currently ranked 690 among 43,000+ contributors, contributing through code contributions and issue resolutions.

- Collaborating with maintainers across multiple repositories.
- Gaining hands-on experience in Git workflows, code reviews, and collaborative development.

PROJECTS

Incidents Tracker Dashboard React.js | FastAPI | Python | SQLAlchemy | SQLite | REST APIs

- Built a full-stack incident monitoring platform aggregating and visualizing real-time outage reports from major cloud and SaaS providers (AWS, Cloudflare, GitHub, Datadog).
- Developed an interactive dashboard for incident tracking, provider-wise analytics, status monitoring, and incident history exploration.
- Implemented search, filtering, severity classification, AI-generated incident summaries, and provider-specific incident timelines.

HTTP Server from Scratch JavaScript | Node.js (TCP Sockets)

- Designed and implemented a custom HTTP/1.1 server from scratch using Node.js TCP sockets without relying on web frameworks.
- Built core HTTP functionalities: request parsing, routing, header processing, query parameter handling, and dynamic response generation.
- Implemented an event-driven architecture using asynchronous I/O, exploring TCP connections, sockets, ports, and HTTP protocol structure.
